

Yaroslav Mudryi

Senior Full Stack Developer

Full-Stack Developer with 8+ years of experience in JavaScript, Python, PHP, SQL, and MongoDB. Love JavaScript and building applications with Laravel. Spend most of my time writing JavaScript and can also help with planning components and user flows. Have significant startup experience and enjoys designing the optimal products. Logical, results-driven problem solver dedicated to delivering competitive and growth-driven solutions. Highly organized, dependable, and always willing to take on new responsibilities to meet team goals.

Working Experience

SENIOR FULL STACK DEVELOPER | DEVELOOP SOFTWARE | 2023 — 2025

- Reengineered internal software system, resulting in a 45% decrease in server latency for 3,000+ daily users
- Launched a RESTful API service with Spring Boot, which simplified data retrieval process, expediting it by 35%
- Spearheaded the evolution of front-end technologies with **JS/TS** frameworks and **tailwindCSS** in our team, amplifying our project completion rate by 25%
- Directed a team of 6 developers, cultivating team cohesion and increasing overall productivity by 35%
- Conducted comprehensive code reviews to pinpoint and remedy 90% of application defects prior to deployment

SENIOR BACKEND DEVELOPER | SECURE STAFFING | 2020 — 2023

- Introduced **Node.js**, **PHP** into our stack, achieving 39% faster data processing on our primary product line
- Collaborated with UX/UI designers to deliver top-notch front-end applications with **React**, **Next** boosting customer experience by 30%
- Led the successful integration of **MongoDB** as our primary **NoSQL** database, streamlining data management and retrieval by 50%
- Managed cross-functional teams of 8 engineers, setting workflow priorities and delivering products within set timelines with a 90% success rate

- Instituted a correlational data analysis system using **Python**, driving data-driven decisions across the company

PHP, REACT DEVELOPER | AWAY DIGITAL TEAMS | 2018 — 2020

- Established repository branching model using Git, improving code health and decreasing conflicts by 60%
- Harmonized data synchronization between front and backend services using **GraphQL**, which increased efficiency of data handling by 45%
- Orchestrated the overhaul of our user authentication protocols with **JWT**, escalating user security and reducing breach incidents by 70%
- Shepherded a team of 5 engineers, focusing on goal setting, regular feedback, and fostering a collaborative environment which uplifted productivity by 30%
- Revamped application architecture to comply with the 12 factor app standards, resulting in robust, scalable, and easily deployable software

INTERNSHIP FULLSTACK DEVELOPER, DEVOPS ENGINEER | SHRADER | 2019 — 2021

- Collaboratively led API development with **Vue.js, Laravel, MySQL**, which streamlined inter-service communications by 50%
- Established caching mechanisms using **Redis**, which resulted in response times being approximately cut in half
- Implemented micro service architecture using **Docker** and Kubernetes, overcoming monolith system limitations and reducing server costs by 30%
- Managed a team of closely-knit engineers, stimulating strong team connection and accelerating project turnaround time by 20%
- Instituted a machine learning model for personalized client experience, escalating engagement and retention by 25%.

Education

Bachelor's Degree of Computer of Science | Universidad Tecnológica Nacional | 2015-2018

Skills & Abilities

PHP, Laravel, Shopify, Node.js, React/Next, Vue.js, Express/Nest, RESTful API, JWT, Python, Django, Flask, ML/AI, MongoDB

Frontend Development, Backend Development, UI/UX, DevOps, SEO

Activities and Interests

Running, Tennis
